PROFESSIONAL SUMMARY

Business analyst with hands-on experience turning operational data into decisions for business leaders across telecom and food-service operations. Master of Computer Information Systems and a Graduate Certificate in Information Technology Project Management (Colorado State University). Strong in advanced Excel and Power BI dashboarding, data reconciliation, operational analysis, and report automation (VBA macros, Python, and AI tools such as Claude and Microsoft Copilot). Known for scoping problems with leadership, building the report that answers them, and explaining findings in plain language.

CORE SKILLS

BI & Reporting: Advanced Excel (pivot tables, SUMIFS, XLOOKUP, Power Query, dashboard design) • Power BI • Tableau (working) • Qlik Sense (foundational) • KPI Reporting

Analytics & Automation: SQL (working) • Python (report automation) • Data Cleaning & Reconciliation • Trend & Variance Analysis • AI-Assisted Analysis (Claude, Microsoft Copilot)

Business Analysis: Problem Scoping • Requirements Gathering • Process Improvement • SOP Documentation • Stakeholder Communication • Presenting to Management • Cross-Functional Collaboration • JIRA • Google Workspace

PROFESSIONAL EXPERIENCE

Junior Business Analyst Intern *Oct 2026 to Present*

Global IT Solutions, Inc. (SAP and Ariba consulting), Remote (Fort Collins, CO)

- Gather stakeholder requirements as user stories and acceptance criteria; map workflows to find delays, errors, and extra steps.
- Analyze data in Excel and SQL, build Excel and Power BI reports on performance indicators, and prepare UAT test cases.
- Built the company's organizational chart from HR employee records, revised through six versions after HR review.

Operations Analyst (Student Supervisor) *Aug 2025 to May 2026*

Ram's Horn Dining Center, CSU Residential Dining Services, Fort Collins, CO

- Produced recurring operational reports and Excel workbooks tracking guest volume, wait times, food waste, restock delays, and safety pass rates across the dining center's service stations.
- Performed routine data review and reconciliation of daily shift records, investigating discrepancies and coordinating corrections before figures rolled up to management reporting.
- Presented findings to management, showing where costs were climbing and why, to inform weekly ordering and scheduling.
- Documented standard operating procedures and checklists, improving restock turnaround and safety compliance.

Co-Owner & Business Operations Analyst *Sep 2022 to Apr 2024*

Vodafone Idea (Cellular Franchise), India

- Scoped analytical problem statements directly with leadership, built Excel dashboards tracking KPIs across revenue, collections, and subscriber data, and presented complex findings in accessible formats.
- Reconciled cash, billing, and inventory records daily, researching variances and resolving escalations with vendors.
- Produced revenue and collections analysis (revenue trends, plan mix, collections aging) that guided staffing, inventory, and promotional decisions.
- Automated recurring billing and collections reports with VBA macros, cutting manual prep time and adding validation checks.
- Supported rollout of new plans and regulatory (KYC) process changes; trained staff and maintained procedural documentation.

ANALYTICS PROJECTS

- Telco Customer Churn Analysis (Python, SQL): end-to-end analysis of 7,043 customer records covering data cleaning and churn drivers by contract, tenure, and payment method.
- Dining Operations Analytics Dashboard (Excel): KPI dashboard built on 4,500+ live SUMIFS/AVERAGEIFS formulas over 4,494 synthetic station-shift records, with five KPIs across station, meal, and monthly breakdowns and trend charts.
- OpsIQ, an Operational Intelligence Platform (Python, SQL), in development: designed to reconcile POS sales against end-of-day cash, flag unbilled sales and cash discrepancies, and send multi-store owners a nightly KPI summary.

EDUCATION & CREDENTIALS

Master of Computer Information Systems, Colorado State University, Fort Collins, CO *May 2026*

Graduate Certificate, Information Technology Project Management, Colorado State University *May 2026*

B.E., Computer Science & Engineering, R.M.K. College of Engineering and Technology, India *Apr 2024*

Google Project Management: Foundations (Coursera)

Relevant Graduate Coursework: Enterprise Computing and Systems Integration (SAP ERP, ERPsim labs), Snowflake (hands-on SQL), Business Intelligence, IT Project Management, Agile Management & Product Development
